DETAILED ACTION

Election/Restrictions

An attempt for provisional restriction requirement was made with Applicant's Attorney, Samson Helfgott. A written request was requested.

Restrictions to one of the following inventions is required under 35 USC 121:

- I. Claims 1-8, 12, 13 and 14, drawn to a decoding method of maximum a posteriori with forward and backward probabilities with storing probabilities and initiating calculation, classified in class 714, subclass 796.
- II. Claims 9-11, 15 and 16, drawn to a decoding method involving parallel method for forward and backward calculations, classified in class 714, subclass 795.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I, a decoding method of maximum a posteriori with forward and backward probabilities with storing probabilities and initiating calculation and Group II, a decoding method involving parallel method for forward and backward calculations are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the claims of Group I do not require the limitations of a decoding method involving parallel method for forward and

Page 3

backward calculations. The subcombination has separate utility such as in a single networked environment.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Art Unit: 2112

Conclusion

Any inquiries concerning this communication should be directed to the examiner,

Mujtaba Chaudry who may be reached at 571-272-3817. The examiner may normally be reached

Mon – Thur 6:30 am to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, please contact the examiner's supervisor, Jacques Louis-Jacques at (571) 272-6962.
